

MUHAMMAD AHMED LASHARI

25000 Peshawar Pakistan, ahmedlashari.official@gmail.com, github.com/Ahmed-lashari, +923349444152, linkedin.com/in/muhammad-ahmed-lashari

OBJECTIVE

ML Engineer focused on NLP, Generative AI, and applied deep learning. Experienced in building end-to-end AI systems, RAG pipelines, and deploying ML applications with FastAPI.

SKILLS

Languages:	Python , NodeJS, JavaScript, Typescript, C/C++, Dart
AI/ML:	Scikit-learn, ML, DL, NLP, LLMs, CNN , RNN , LSTM, Transfer Learning
LLM Stack:	LangChain , RAG, AI Agents, Hugging Face, OpenAI API, Claude API, PGVector
GenAI:	Prompt Engineering, Vector DB, Semantic Search, Embeddings , Model Inference
Backend & Data:	FastAPI , Node.js, REST APIs, PostgreSQL, MongoDB, Neo4j, Supabase, Firebase
Libraries & Tools:	TensorFlow , Keras , Pandas, NumPy, Matplotlib, Git, GitHub, Streamlit, n8n
Core Knowledge:	Linear Algebra, Probability, Statistics, Model Evaluation
Soft Skills:	Communication, Work Ethics, Problem Solving, Time Management

WORK EXPERIENCE

AI Intern @ CrovenAI | July 2026 to September 2026

- Developed **LLM-powered AI agents** using LangChain with tool integration for task automation.
 - Built RAG pipelines using embeddings, semantic search, and **PGVector** for context-aware retrieval.
 - Built and optimized document chunking strategies to improve retrieval accuracy and response quality.
- Tech Stack:** Python, **LangChain**, OpenAI API, PGVector, PostgreSQL, RAG, Embeddings, Semantic Search, Prompt Engineering, Google Calendar API.

Flutter Specialist & AI-Co-Lead @ SONNY | May 2025 to October 2025

- Developed an **AI-powered chatbot** for the SONNY e-commerce platform with the AI team.
 - Prepared production-ready **customer datasets** through data collection, cleaning, and structuring.
 - **Mentored junior interns**, assigned tasks, and **coordinated with the executive team** over development.
- Tech Stack:** Flutter, Dart, Firebase, REST APIs, Python, pandas, numpy, SQL, OpenAI API

PROJECTS

RaabtaAI | AI Powered Receptionist

- Developed a **RAG based AI assistant** for accurate, document grounded question answering using **LangChain**.
 - Built a PDF ingestion pipeline with **chunking**, embeddings, **semantic retrieval**, vector indexing, and **pgvector**.
 - Designed a multi tenant knowledge base with persistent chat history and shareable AI assistants using PostgreSQL.
- Tech Stack:** Python, FastAPI, LangChain, **Sentence Transformers**, LLM, pgvector, SQLAlchemy, PyMuPDF.

ATSense | AI Resume Screening Platform

- Built an **AI powered resume screening** platform that ranks candidates against job descriptions.
 - Generated explainable reports with skill-gap analysis and batch screening for **1000+ resumes**.
- Tech Stack:** Python, **Pydantic**, FastAPI, PostgreSQL, **OpenAI API**, LangChain, Embeddings, **Semantic Scoring**.

CNN-RNN OCR | Prescription OCR Pipeline

- Built a CNN RNN OCR pipeline for handwritten prescription recognition using transfer learning.
 - Trained on **77k unlabeled** and **9k labeled** samples with CER-based evaluation.
- Tech Stack:** Python, TensorFlow, Keras, CNN, RNN, AutoEncoders.

EDUCATION

Bachelor of Science (Artificial Intelligence)

FAST - National University of Computer and Emerging Science | **Graduation: August 2027**

Course Work: Data Structures, Algorithms, Artificial Intelligence, Machine Learning, NLP, Neural Network
